

MEET THE DANDYVICE

MAKING SCIENTISTS LIVES EASIER

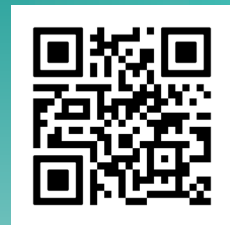

Thanks to the handy dandyVice manual sample filtration has been ergonomically simplified.

- Reduce pain in the hand and thumb when dealing with samples having high concentrations of solids, viscosity or high molecular weight
- Ideal for routine sample filtration accommodating syringe sizes of 1 ml – 20 ml with associated filter discs
- Available as a hand held device, wall mount, or free standing on the lab bench with the dandy stand
- Have your own syringes and filter discs? No problem! The dandyVice can be used with commercial brands

BETTER SAMPLE PREP = BETTER CHROMATOGRAPHY

AMT and Dandy Innovations are partnering to deliver a better presentation of the sample to the detector
